

Who's There? Alamogordo Primate Facility (APF)

A listing of 245 chimpanzees held at APF -- separated by decade of birth. **The current population is 215 (190 on site and 25 at New Iberia),** according to data provided by the National Institutes of Health (NIH) in April 2010.

APF holds 34 chimpanzees born prior to the 1975 ban on capturing free-living chimpanzees in Africa, indicating that some may have been captured from the wild as infants. The facility also holds four chimpanzees born after the 1995 voluntary federal breeding moratorium. Of the current population, there are 28 elder females and 60 elder males.

Chimpanzees are considered elderly beginning at 25 years for males (DOB 1985 or earlier) and 30 years for females (DOB 1980 or earlier). *

If you have current or historic information on the chimpanzees held at this facility, please email releasechimps@neavs.org.
