

Who's There? Alamogordo Primate Facility (APF)

A listing of 245 chimpanzees held at APF – separated by decade of birth. As of 10/31/08, the current population is 231, according to data provided by the National Institutes of Health (NIH) on 12/16/08.

APF holds 40 chimpanzees born prior to the 1975 ban on capturing free-living chimpanzees in Africa, indicating that some may have been captured from the wild as infants. The facility also holds five chimpanzees born after the 1995 voluntary federal breeding moratorium. Of the current population, there are 27 elder females and 74 elder males.

Chimpanzees are considered elderly beginning at 25 years for males (DOB 1984 or earlier) and 30 years for females (DOB 1979 or earlier).*

If you have current or historic information on the chimpanzees held at this facility, please email releasechimps@neavs.org.

	NAME	ID #	GENDER	BIRTH DATE	NOTES
1	Flo	775	F	29-Sep-57	ALERT: One of the oldest chimpanzees held for research
