

## Who's There? MD Anderson Cancer Center

### A listing of 185 chimpanzees held at MD Anderson Cancer Center – separated by decade of birth.

**The current population is 168**, according to data provided by the facility on 11/21/08. The location of seven chimpanzees on this list is unknown.

MD Anderson holds 42 chimpanzees born prior to the 1975 ban on capturing free-living chimpanzees in Africa, indicating that some may have been captured from the wild as infants. The facility also holds nine chimpanzees born after the 1995 voluntary federal breeding moratorium. Of the current population, there are 31 elder females and 37 elder males.

Chimpanzees are considered elderly beginning at 25 years for males (DOB 1984 or earlier) and 30 years for females (DOB 1979 or earlier).\*

**If you have current or historic information on the chimpanzees held at this facility, please email [releasechimps@neavs.org](mailto:releasechimps@neavs.org).**
