

Who's There? National Institutes of Health (NIH)

A listing of 35 chimpanzees held at NIH -- separated by decade of birth.

(Data originally obtained by Stop Experimentation on & Exploitation of Chimpanzees (SEEC) as of 1/15/03 for the National Institute of Allergy and Infectious Diseases (NIAID), a division of NIH. Older information from NIH revealed a total of 11 chimpanzees as of 2002, but no further details were provided.)

This facility holds two chimpanzees born prior to the 1975 ban on capturing free-living chimpanzees in Africa, indicating that some may have been captured from the wild as infants. The facility also holds 14 born after the 1995 federal breeding moratorium.

If you have current or historic information on the chimpanzees held at this facility, please contact us.
